PROFILE

Operations professional moving into analytics after hands-on transport, pharmacy inventory and distribution work. Builds decision-focused Power BI, SQL and Python projects on real public and synthetic data, and labels synthetic results separately from field outcomes.

WORK EXPERIENCE

- Assistant Enforcement Inspector | Assam Transport Department**Jan 2026 - Present
 - Coordinated vehicle sourcing, dispatch and contingencies for major events involving 1,000+ vehicles; maintained daily operations reporting.
 - Worked with transport vendors and multi-site teams to resolve capacity and timing issues during live deployment.
- Business Operations & Inventory Manager | Baruah Medicos**Jun 2024 - Dec 2025
 - Increased monthly pharmacy sales from ₹45,000 to ₹1.5 lakh in one year; used eVitalRx and weekly MIS to guide replenishment.
 - Reported 100% emergency fulfillment and approximately 20% lower overstock through reorder and supplier coordination.
- Co-founder, Operations & Distribution | RhinoBrews / Borjan Tea**Nov 2022 - Dec 2025
 - Built a network of 15+ suppliers, 30+ B2B wholesalers and 100+ retail outlets across five markets and two distribution centres.
- Key Account Manager | Saint-Gobain India**May 2022 - Sep 2022
- Teacher | Little Angels School**May 2018 - Jun 2019
- Apprentice | Indian Oil Corporation (IOCL), Digboi**Apr 2017 - Apr 2018

SELECTED ANALYTICS WORK

- Late Deliveries Cost Stars | Olist e-commerce, real public data**SQL + Power BI case study
 - Analysed 96,478 real delivered orders in PostgreSQL (CTEs, window functions) after data checks: late orders averaged 2.27 vs 4.29 stars.
 - Found 72% of late orders left the seller on time and one lane (SP to RJ) held 17.7%; recommended lane fixes.
 - Published a live 6-page Power BI report on the SQL views; its 12 headline numbers reconcile to SQL.
- ProcureAI FMCG | Procurement analytics on synthetic data**Portfolio project
 - Built a PostgreSQL warehouse (1.1M synthetic rows, 68 SQL tests) and a 9-page Power BI report with 32 DAX measures and 5 row-level security roles; all 28 KPIs reconcile to SQL; report published live.
 - Ranked invoice exceptions and cited contract pages for human review; reported limits openly: 56% accuracy on unseen contract questions, and the risk models did not beat the best simple baselines.
- NorthEast HealthLink | Synthetic OTIF decision system**Portfolio project
 - Designed three risk checkpoints and a human-approved intervention path for OT, IF and OTIF (HTML prototype).
- Business Insights 360 | Codebasics training dataset**Power BI course project
 - Analysed ~4M rows across Finance, Sales, Marketing and Supply Chain in a public seven-page Power BI report.

TOOLS AND EDUCATION

Power BI, DAX, Power Query, SQL (PostgreSQL), Python, Excel, GenAI, RAG, eVitalRx | PGDM (dual: Operations & Marketing), MDI Murshidabad (2022) | B.Sc. Physics, Dibrugarh University (2016)
