PROFILE

Operations professional moving into analytics after hands-on transport, pharmacy inventory and distribution work. Builds decision-focused Power BI, SQL and Python portfolio projects and labels synthetic results separately from field outcomes.

SELECTED OPERATIONS EXPERIENCE

Assistant Enforcement Inspector | Assam Transport Department Jan 2026 - Present

- Coordinated vehicle sourcing, dispatch and contingencies for major events involving 1,000+ vehicles; maintained daily operations reporting.
- Worked with transport vendors and multi-site teams to resolve capacity and timing issues during live deployment.

Business Operations & Inventory Manager | Baruah Medicos Jun 2024 - Dec 2025

- Increased monthly pharmacy sales from ₹45,000 to ₹1.5 lakh in one year; used eVitalRx and weekly MIS to guide replenishment.
- Reported 100% emergency fulfillment and approximately 20% lower overstock through reorder and supplier coordination.

Co-founder, Operations & Distribution | RhinoBrews / Borjan Tea 2023 - 2025

- Built a network of 15+ suppliers, 30+ B2B wholesalers and 100+ retail outlets across five markets and two distribution centres.

SELECTED ANALYTICS WORK

ProcureAI FMCG | Procurement analytics on synthetic data Portfolio project

- Built a PostgreSQL warehouse (1.1M synthetic rows, 68 SQL tests) and a 9-page Power BI report with 32 DAX measures and 5 row-level security roles; all 28 KPIs reconcile to SQL; report published live.
- Ranked invoice exceptions and cited contract pages for human review; reported limits openly: 56% accuracy on unseen contract questions, and the risk models did not beat the best simple baselines.

NorthEast HealthLink | Synthetic OTIF decision system Portfolio project

- Designed three risk checkpoints and a human-approved intervention path; report and synthetic data distinguish forecast signals from observed outcomes.
- Modelled OT, IF and OTIF in a nine-page report design (HTML prototype) with order drill-through and operational monitoring.

Business Insights 360 | Codebasics training dataset Power BI course project

- Analysed approximately 4 million rows across Finance, Sales, Marketing and Supply Chain in a public seven-page Power BI report.

TOOLS AND EDUCATION

Power BI, DAX, Power Query, SQL, Python, Excel, eVitalRx | PGDM, Operations & Marketing, MDI Murshidabad (2022) | B.Sc. Physics, Dibrugarh University (2016)
